[MEET THE SPEAKERS](#)

There are two options for participating in this event:

April 14, 6:00pm-8:00pm EDT: Live presentations and live Q&A with the speakers. *Registration for the April 14 webinar has closed.*

April 19, 10:00am-11:00am EDT: [Live Q&A with speakers](#). Registrants will be asked to view the [pre-recorded event](#) prior to joining the session. *Registration for the April 19 webinar has closed.*

#GlobalScience

Developing a robust and generalizable model of child development requires that we study broad samples of children from around the world, yet studies of child development remain concentrated in regions of North America and Western Europe. In this webinar, developmental scientists from Africa, Asia, Europe, North and South America will discuss challenges and opportunities in conducting developmental research in diverse world regions. Speakers will focus on:

- the experiences of researchers from traditionally **under-represented regions**;
- the process of **building research capacity** in developing nations; and
- international efforts to **broaden participation** in developmental science.

Registration for the April 14 and April 19 webinar has closed.

Agenda

Welcome and Introduction

Speaker Presentations

- **Dr. Bobby Cheon, Ph.D.**, National Institutes of Health (United States of America)
- **Dr. Reiko Mazuka, Ph.D.**, RIKEN Center for Brain Science (Japan)
- **Dr. Dana Basnight-Brown Ph.D.**, United States International University (Kenya)
- **Dr. Natália Dutra, Ph.D.**, Núcleo de Pesquisa e Teoria do Comportamento, Universidade Federal do Pará (Brazil)
- **Dr. Rowena Garcia, Ph.D.**, The Max Planck Institute for Psycholinguistics (The Netherlands)
- **Dr. Michael Frank, Ph.D.**, Stanford University (United States of America)

- **Dr. Leher Singh, Ph.D.**, *moderator*, Society for Research in Child Development (United States of America)
