International Human Rights Day

December 10, 2017

#HumanRightsDay
#childdevelopment

The Society for Research in Child Development (SRCD) recognizes the connections between human rights and the child development, including the rights of children to physical, social, and emotional health, safety, and well-being; the rights of child development researchers to conduct work without fear of harassment or intimidation; and the rights of citizens to access scientific knowledge on child development.

SRCD is a proud member of the AAAS Science and Human Rights Coalition, a network of scientific, engineering and health membership organizations that recognize the role of science and scientists in the promotion and protection of human rights. The Coalition is devoted to:

- (1) Bridge-building and coordinating both within the scientific community – among scientific associations and across disciplines – and between the scientific and human rights communities.
- (2) Education and capacity-building, within scientific associations and within the human rights community.

To support this commitment, the SRCD Equity and Justice Committee, the Asian Caucus, the Black Caucus, and the Latino Caucus identified the following resources on the topic of human rights and child development:

Resource List for International Human Rights Day

Alderson, P. (2000) *Young children's rights: Exploring beliefs, principles and practice*. London, United Kingdom: Jessica Kingsley.
